Please list other important factors, such as future inheritances, family requirements, charitable contributions, large future expenditures, or family medical/health concerns:

② OTHER INCOME & EXPENDITURES

I/We have other sources of income, such as pensions (ie. military), PBGC income, annuities, rental income, other employment, etc. we would like to include in our Wealthcare Plan. This does not include Cleary Gull portfolio income or previously listed investments.

Description ¹	Annual Amount	Starting Age ²	Ending Age ²	Whose Age? ³	Inflation Adjust
▶ PBGC	\$				Y / N
▶	\$				Y / N
▶	\$				Y / N
▶	\$				Y / N

¹Pension plan, spouse's trust fund, rental income, etc.

²Enter age or event (i.e., now, retirement or death).

³Client, spouse, partner, etc.

Other Expenditures: Outside of our annual retirement income needs, we anticipate spending additional retirement dollars for the following goals.

Description ¹	Annual Amount	Starting Age ²	Ending Age ²	Whose Age? ³	Inflation Adjust
▶	\$				Y / N
▶	\$				Y / N
▶	\$				Y / N
▶	\$				Y / N

¹Airplane, boat, vacation home, RV, season tickets, etc.

²Enter age or event (i.e., now, retirement or death).

³Client, spouse, partner, etc.

③ ASSET ALLOCATION/RISK PROFILE

Portfolio- Stocks/Bonds	Potential Average Return	Odds of Losing Money in Any One Year	Worst Year Since 1926	Percent in Stocks
Portfolio A	11.50%	1 in 4	-40%	100%
Portfolio B	11.10%	1 in 4	-37%	90%
Portfolio C	10.60%	1 in 4	-33%	80%
Portfolio D	9.50%	1 in 5	-26%	60%
Portfolio E	8.60%	1 in 6	-20%	50%
Portfolio F	7.60%	1 in 8	-15%	30%

Wealthcare planning assumes you would prefer to avoid risk if possible. Based on your desire to avoid unnecessary investment risk, the portfolio that best fits your *ideal* tolerance for risk is for Portfolio _____ (*most conservative*).

Sometimes your ideal portfolio may be too conservative to produce returns that would enable you to meet your most important financial goals. If necessary, to meet financial goals you feel are critical, the portfolio that has the most risk you could possibly tolerate and that you find *acceptable* is Portfolio _____ (*most volatile*).

④ RETIREMENT GOALS

- Ideally, I would like to retire at age _____, but if needed to meet other more important goals, I would be willing to work to age _____. (*Input "now" if already retired*)
- My spouse/partner will retire at the same time as I do: YES NO
If NO, my spouse/partner would ideally like to retire at age _____, but if needed to meet other more important financial goals, would be willing to work to age _____. (*Input "now" if already retired*)
- If possible, I/we would like to leave an estate worth at least \$_____, but would be willing to leave as little as \$_____.
- I/We would *ideally* like an annual spending budget of \$_____, but in no case less than \$_____ (*net after-tax value*).
- Include Social Security benefits in Wealthcare analysis: YES NO

If YES, Wealthcare can estimate your Social Security benefit for you or you may provide your own estimate benefit per individual in the spaces below:

SS Benefit	Client:	Spouse/Partner:	Joint & Survivor:
------------	---------	-----------------	-------------------

⑤ RETIREMENT GOAL PRIORITIES

We need to prioritize your goals to identify those alternatives that make the most sense for what you want to accomplish. Please complete the following:

Question 1

Investment risk (volatility or risk of losing money) is something we all wish to avoid if possible. With Wealthcare we can often take less than our maximum tolerance for risk by making relatively minor modifications to our other goals.

Please answer the following question:

I would be willing to do the following to design a plan that takes less risk than my maximum risk tolerance indicates (check all that apply):

- Save \$_____ more a year than I'm currently saving*
- Retire later than my ideal retirement age*
- Leave a smaller estate than my ideal estate*
- Lower my retirement income to more modest levels*
- I'm comfortable with taking risk (based on my maximum tolerance), and I'd prefer to accept that level of investment risk rather than modify any of these other goals.*

Question 2

Saving money is usually necessary to achieve your financial goals. However, it may also mean you are making sacrifices in your current lifestyle to achieve future goals. Please answer the following question:

If possible, I would like to reduce my current annual savings by \$_____ a year so I can improve my current lifestyle. To meet this goal I would be willing to modify the following goals (check all that apply):

- Take more risk than my maximum risk tolerance indicates*
- Retire later than my ideal retirement age*
- Leave a smaller estate than my ideal estate*
- Lower my retirement income to more modest levels*
- I'm comfortable with taking risk (based on my maximum tolerance), and I'd prefer to accept that level of investment risk rather than modify any of these other goals.*

Question 3

When you plan to retire can have a significant impact on the probability of achieving your financial goals because it is the age when you stop saving and begin withdrawals from investments. Please complete the following question:

To retire at my ideal retirement age, I would be willing to modify the following goals (check all that apply):

- Take more risk than my maximum risk tolerance indicates*
- Save \$_____ more a year than I'm currently saving*
- Leave a smaller estate than my ideal estate*
- Lower my retirement income to more modest levels*
- Retiring at my ideal retirement age isn't as important as these other goals, so I'm comfortable delaying retirement to alter age to avoid modifying these other goals.*

Question 4

Many people have charitable desires or wish to pass wealth on to their family to provide financial security. Doing so can mean compromising other goals. Please answer the following questions:

To achieve my ideal estate or charitable goals, I would be willing to modify the following goals (check all that apply):

- Take more risk than my maximum risk tolerance indicates*
- Retire later than my ideal retirement age*
- Save \$_____ more a year than I'm currently saving*
- Lower my retirement income to more modest levels*
- While I'd like to achieve my estate goals, doing so isn't as important as these other objectives, so I'd be willing to reduce my estate goal to avoid modifying these other goals.*

Question 5

Your lifestyle in retirement is dependent both on the resources you have available and your personal preferences. Most people would like to have a comfortable retirement income and lifestyle. Please answer the following questions:

To maximize my retirement income, I would be willing to modify the following goals (check all that apply):

- Take more risk than my maximum risk tolerance indicates*
- Retire later than my ideal retirement age*
- Save \$_____ more a year than I'm currently saving*
- Leave a smaller estate than my ideal estate*
- I'd like to have a very comfortable retirement, but I would be willing to live a more modest lifestyle in retirement rather than changing these other goals.*
